

WAWA GOLD PROJECT

Exploration Success
Leading to Resource Growth

OCTOBER 2022

ONTARIO

TSX-V: RPX | OTCQB: RDEXF

REDPINEEXP.COM

Forward Looking Information

This presentation, the information contained herein, any other materials provided in connection with this presentation and any oral remarks accompanying this presentation (collectively, the "Presentation"), have been prepared by Red Pine Exploration Inc. ("Red Pine" or the "Company") solely for information purposes. No stock exchange, securities commission or other regulatory authority has approved or disapproved of the information contained herein. This Presentation does not constitute an offering of securities and the information contained herein is subject to the information contained in the Company's continuous disclosure documents available under the Company's profile on www.SEDAR.com.

This Presentation contains "forward-looking information" within the meaning of applicable Canadian securities legislation or "forward-looking statements" within the meaning of applicable United States securities legislation (collectively, "forward-looking statements"). The forward-looking statements herein reflect management's expectations regarding the future growth, results of operations, performance and business prospects and opportunities of Red Pine. Such forward-looking statements may include, but are not limited to, statements with respect to the future outlook of the Company, business plans and strategies, proposed exploration plans, future commodity prices; success of exploration activities; results of the Technical Report (as hereinafter defined), the characteristics and potential of the Wawa Gold Project, completion of any recommended work programs or expansions and any timing thereof, and working capital.

Often, but not always, forward-looking statements can be identified by the use of words such as "plans", "expects", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", "believes" or variations (including negative and grammatical variations) of such words and phrases, or statements that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved.

Forward-looking statements involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others: general business, economic, competitive, political and social uncertainties; uncertainties arising from the COVID-19 outbreak; the actual results of current exploration activities; condusions of economic evaluations; fluctuations in currency exchange rates; changes in project parameters as plans continue to be refined; changes in labour costs or other costs; future prices of zinc, lead, vanadium, copper, silver and gold or other metal prices; possible variations of mineral grade or recovery rates; failure of equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the mining industry, including but not limited to environmental hazards, equipment breakdown, employee sickness and acts of God or other unfavourable operating conditions and losses; delays caused due to a breakdown in relations with First Nations Bands on whose traditional territory the Wawa Gold Project (as hereinafter defined) is located; delays in obtaining governmental approvals, project financing or in the completion of exploration activities; and the factors discussed in the section entitled "Risk Factors" in this Presentation. Readers are cautioned that the foregoing list of factors and those contained elsewhere in this Presentation are not exhaustive.

Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking statements contained herein are made as of the date of this Presentation and Red Pine disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise, except as required by applicable laws. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements.

Mineral Resource Estimates, Qualified Person

In accordance with applicable Canadian securities regulatory requirements, unless otherwise stated, all current mineral resource estimates of the Company disclosed in this Presentation have been prepared in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects ("NI 43-101"), classified in accordance with Canadian Institute of Mining Metallurgy and Petroleum's "CIM Standards on Mineral Resources and Reserves Definitions and Guidelines" (the "CIM Guidelines").

Pursuant to the CIM Guidelines, mineral resources have a higher degree of uncertainty than mineral reserves as to their existence as well as their economic and legal feasibility. Inferred mineral resources, when compared with measured or indicated mineral resources, have the least certainty as to their existence, and it cannot be assumed that all or any part of an inferred mineral resource will be upgraded to an indicated or measured mineral resource as a result of continued exploration. Accordingly, readers are cautioned not to assume that all or any part of a mineral resource exists, will ever be converted into a mineral reserve, or is or will ever be economically or legally mineable or recovered. The Company is not aware of any environmental, permitting, legal, title-related, taxation, socio-political, marketing or other relevant issue that could materially affect the mineral resource estimate.

Unless stated otherwise herein, all scientific and technical data contained in this presentation has been reviewed, approved and verified by Quentin Yarie, P.Geo. and Chief Executive Officer of Red Pine who is a Qualified Person for the purposes of NI 43-101.

Please refer to the technical report prepared in respect of the Wawa Gold Project entitled "National Instrument 43-101 Technical Report for the Wawa Gold Project", Brian, Thomas P.Geo., Golder Associates Ltd., effective July 16, 2019 (the "Technical Report") which is available under the Company's profile at www.SEDAR.com.

Exploration Success in 2021 – **Focused on Expanding Resources**

100% owned Wawa Gold Project ✓

Funded to complete a focused and sustained exploration program well into 2022 ✓

Initial 2021 drill results highly successful in confirming gold mineralization extension beyond footprint of existing resources ✓

High-quality project hosting numerous historic mines and untested targets, in addition to the depth potential of existing resources ✓

Strategically located in Ontario's Tier 1 Michipicoten Greenstone Belt which has experienced a vast influx of recent gold mining activity ✓

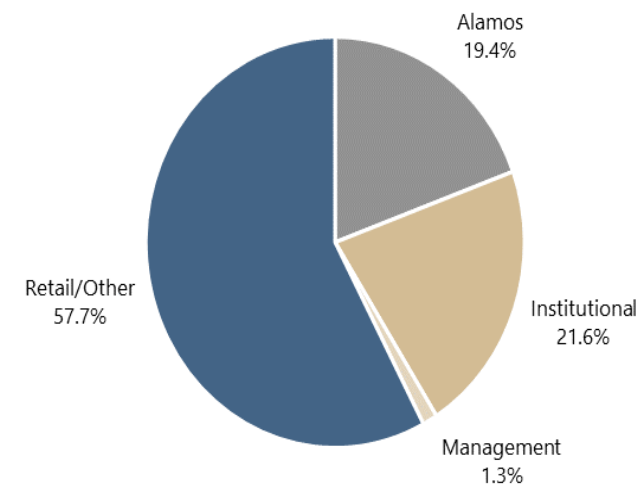

Capital Structure^(CAD)

TEST DRILLING OF EXPLORATION TARGETS

Historic Darwin-Grace Gold Mineralization

"Greenfield" exploration in the Darwin-Grace Mine area **reveals multidimensional network of mineralized shear zones** that each have potential to host zones of gold mineralization

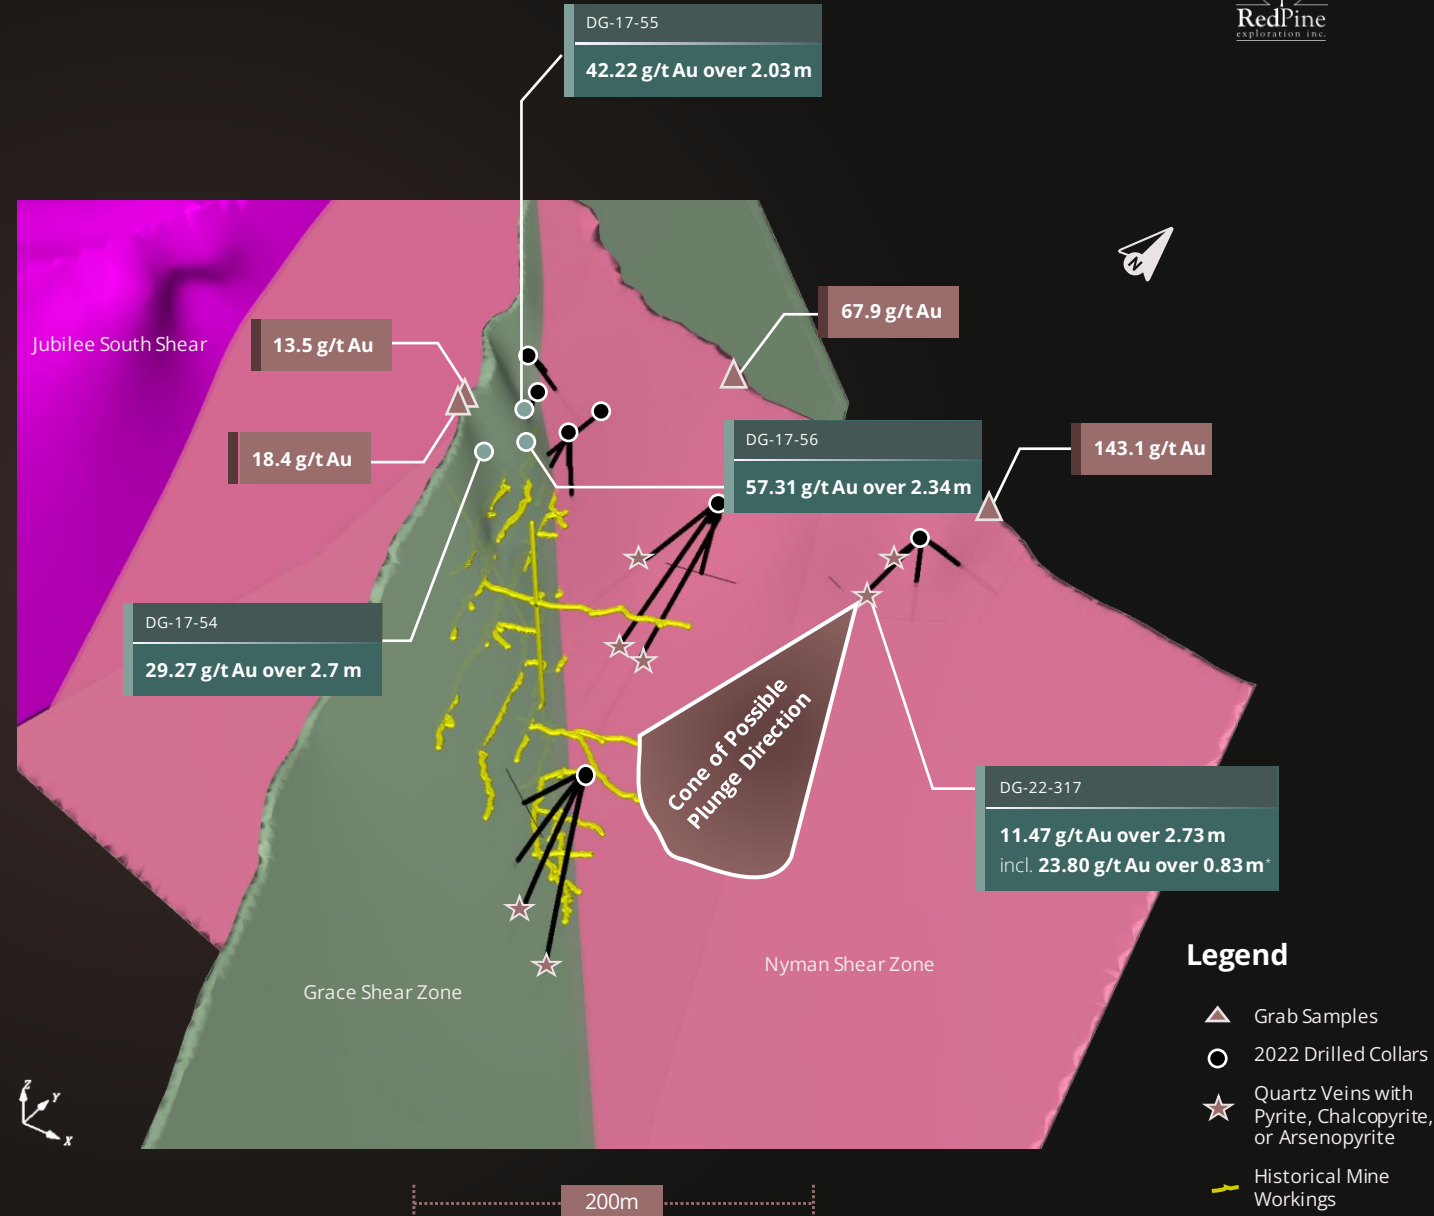

Visual indicators of gold mineralization observed in 3 major structures: Grace Shear Zone, the Nyman Shear Zone, and a newly discovered, yet to be named shear zone, and in multiple intersects in the Nyman Shear Zone

Historic operations exhibit **potential to host high grade gold mineralization, averaging over 11 g/t in 1934 (40 tonnes/day)** with one vein averaging 571 oz/tonne from the 900 ft mark: Intersect of down-plunge extension in DG-22-344A

Recent News

NEWS RELEASE

September 6, 2022

Surluga North

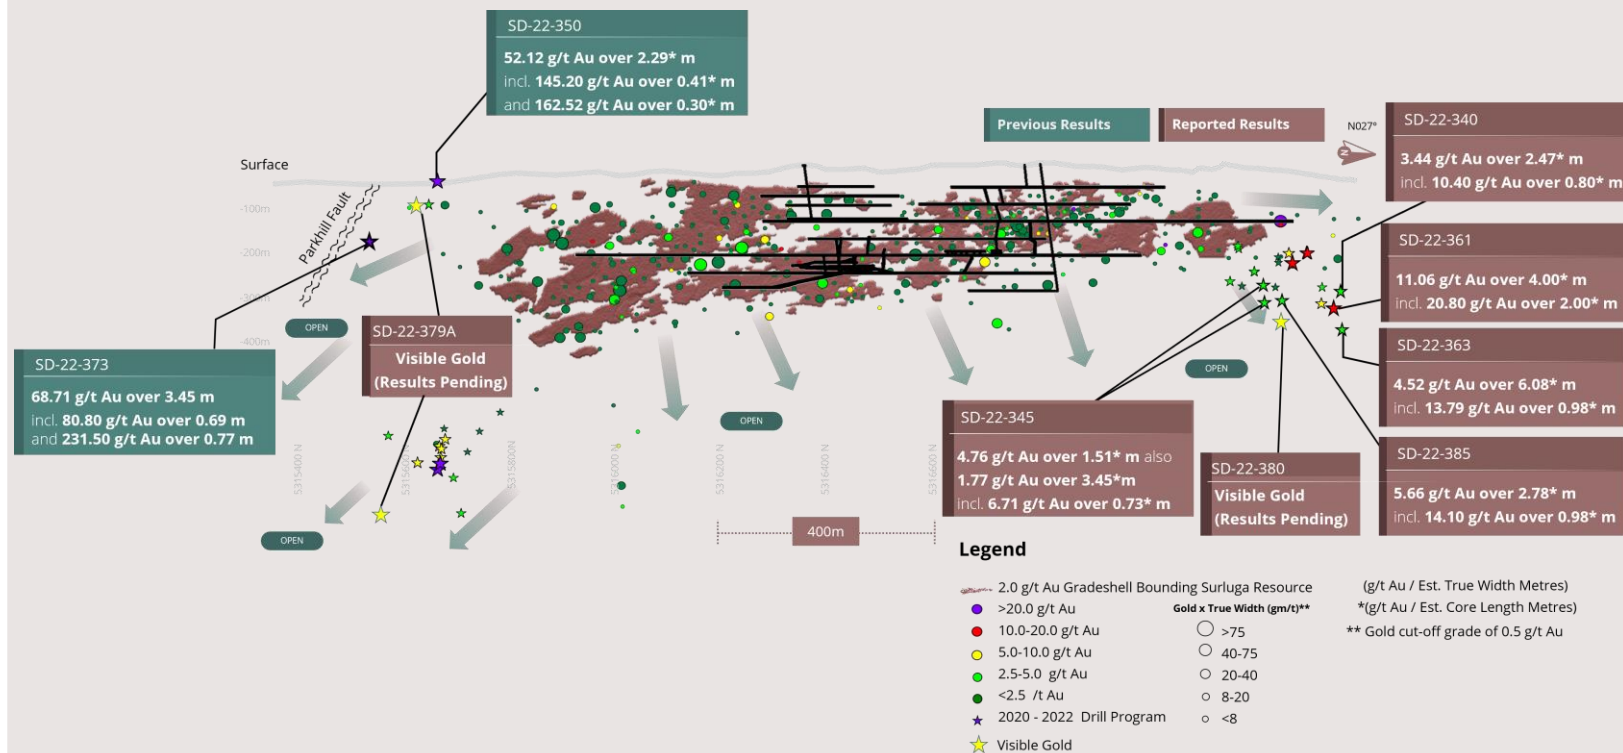

- High-grade mineralization occurs up to 325 metres (m) away from the current resource boundary in the Surluga North area with the zone open down-dip and longitudinally north and south
- Intersection of 11.06 g/t gold over 4.00 meters, including 20.80 g/t gold over 2.00 meters, in the Surluga North discovery

Surluga South

- New and shallow network of mineralized quartz veins discovered in SD-22-379A with visible gold observed in two separate veins (assay pending)
- Observation of visible gold in a quartz vein in the Jubilee Shear Zone in SD-22-379A that is located at the outer edge of the Surluga South discovery indicating that the mineralization in the Jubilee shear zone (JSZ) continues to depth (assays pending)

Jubilee Shear Zone south of the Parkhill Fault

- 2022 drilling confirmed the JSZ over an additional strike length of 1.8 km – for a total of more >6 km of the gold bearing structure.
- Discovery of 42.95 g/t Au over 1.92 metre, including 85.72 g/t over 0.96 metre, in the Jubilee Shear Zone south of the Parkhill Fault in JS-22-368
- Gold mineralization in JS-22-387 in the Jubilee Shear Zone located 1.2 km north of JS-22-368.

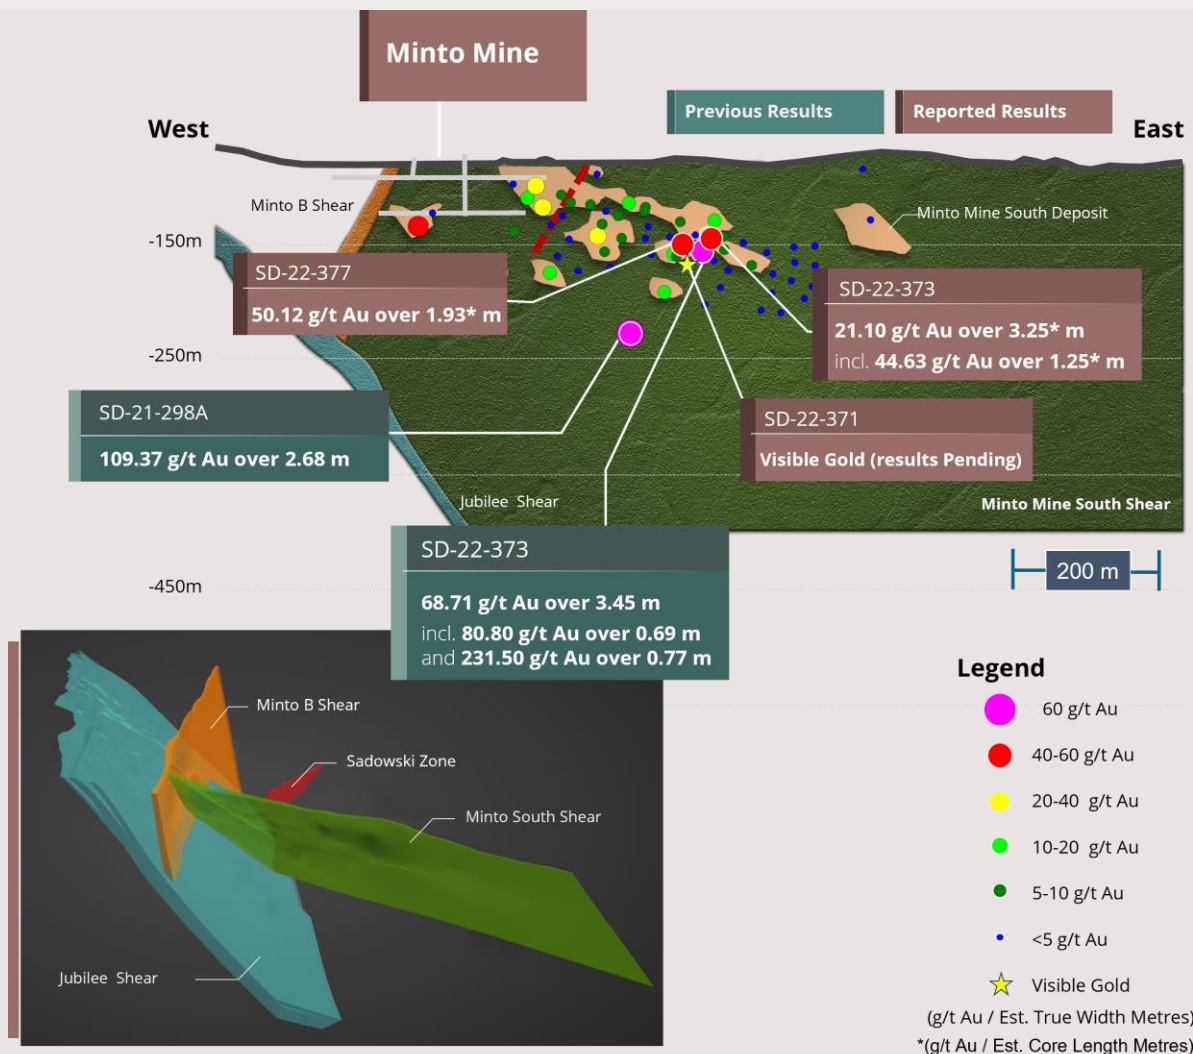

Recent News

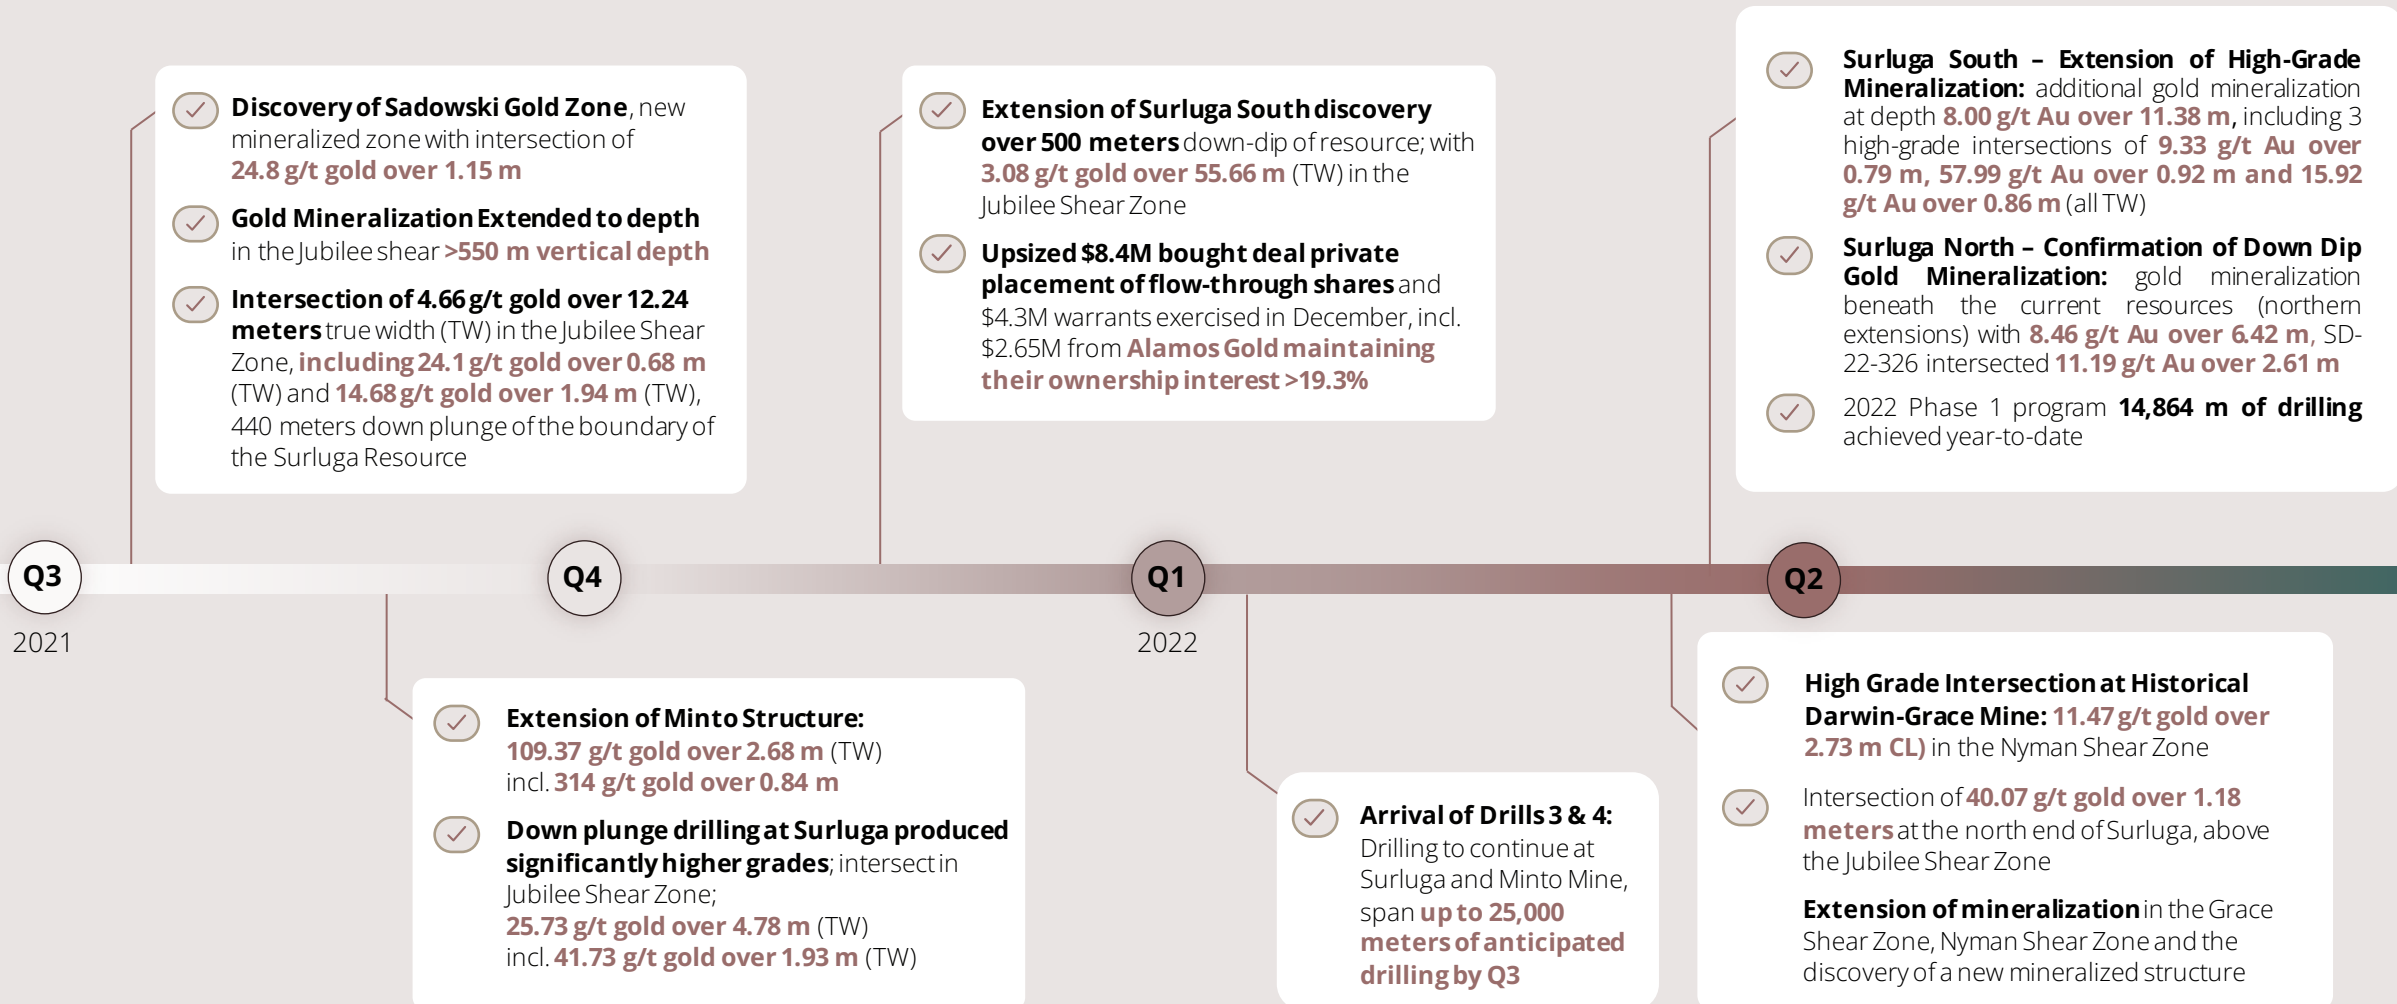

NEWS RELEASE

September 1, 2022

- Intersection of 17.49 g/t Au over 5.82 meters, including 50.12 g/t Au over 1.93 meter, in a gap in the current resource of the Minto Mine Deposit in SD-22-377.
- The intersection is located 30 meters up-plunge of the intersection of 68.71 g/t Au over 4.72 meters in SD-22-373 (see news release of July 14, 2022)
- Intersection of 21.10 g/t Au over 3.25 meters, including 44.63 g/t Au over 1.25 meter, in the Minto Stockwork surrounding the Minto Vein in SD-22-373
- Visible gold observed in SD-22-371 that infills a gap in the current resource of the Minto Mine deposit (assays pending)

Recent Accomplishments: Systematic Progression Leading to Success

Recent Accomplishments: Systematic Progression Leading to Success

- ✓ **Discovery of Sadowski Gold Zone**, new mineralized zone with intersection of **24.8 g/t gold over 1.15 m**
- ✓ **Gold Mineralization Extended to depth** in the Jubilee Shear **>550 m vertical depth**
- ✓ **Intersection of 4.66 g/t gold over 12.24 meters** true width (TW) in the Jubilee Shear Zone, **including 24.1 g/t gold over 0.68 m (TW)** and **14.68 g/t gold over 1.94 m (TW)**, 440 meters down plunge of the boundary of the Surluga Resource

Q4

2021

- ✓ **Extension of Minto Structure:** **109.37 g/t gold over 2.68 m (TW)** incl. **314 g/t gold over 0.84 m**
- ✓ **Down plunge drilling at Surluga produced significantly higher grades;** intersect in Jubilee Shear Zone; **25.73 g/t gold over 4.78 m (TW)** incl. **41.73 g/t gold over 1.93 m (TW)**

- ✓ **Extension of Surluga South discovery over 500 meters** down-dip of resource; with **3.08 g/t gold over 55.66 m (TW)** in the Jubilee Shear Zone
- ✓ **Upsized \$8.4M bought deal private placement of flow-through shares** and \$4.3M warrants exercised in December, incl. \$2.65M from **Alamos Gold maintaining their ownership interest >19.3%**

Q1

2022

- ✓ **Arrival of Drills 3 & 4:** Drilling to continue at Surluga and Minto Mine, span **up to 25,000 meters of anticipated drilling by Q3**

- ✓ **Surluga South – Extension of High-Grade Mineralization:** additional gold mineralization at depth **8.00 g/t Au over 11.38 m**, including 3 high-grade intersections of **9.33 g/t Au over 0.79 m**, **57.99 g/t Au over 0.92 m** and **15.92 g/t Au over 0.86 m (all TW)**
- ✓ **Surluga North – Confirmation of Down Dip Gold Mineralization:** gold mineralization beneath the current resources (northern extensions) with **8.46 g/t Au over 6.42 m**, SD-22-326 intersected **11.19 g/t Au over 2.61 m**
- ✓ 2022 Phase 1 program **14,864 m of drilling** achieved year-to-date

Q2

- ✓ **High Grade Intersection at Historical Darwin-Grace Mine:** **11.47 g/t gold over 2.73 m CL)** in the Nyman Shear Zone
- ✓ Intersection of **40.07 g/t gold over 1.18 m** at the north end of Surluga, above the Jubilee Shear Zone
- ✓ **Extension of mineralization** in the Grace Shear Zone, Nyman Shear Zone and the discovery of a new mineralized structure

- ✓ **Sadowski Zone:** up-dip extension **52.12 g/t gold over 2.29 m** including **162.52 g/t gold over 0.30 m** and **145.20 g/t gold over 0.41 m**
- ✓ **Extension of Surluga North - 8.44 g/t gold over 5.71 m** in down plunge extension, primary mineralization zone open at depth and along strike. **Intersect of significant gold in the Jubilee Shear Zone**, 260 m down-dip
